2013 SPE Conference

MPN JV signs
agreement on
QIPP

FRSC Road
Safety Awareness
Initiative launch

MON holds
35th Annual
General Meeting
Real progress is when we succeed together.

ExxonMobil affiliates understand that no business exists in isolation. For us, corporate citizenship has never been a philanthropic endeavour but a core business strategy. We recognise that communities and businesses can have extensive impact on each other. A collaborative operating environment, for instance, allows us invest continually in the neighbouring communities, contributing to the development of a prosperous society and strengthening our license to operate.

Therefore, we are committed to helping improve the standard of living in communities where we operate in Nigeria. It’s a win-win situation which profits everyone.

ExxonMobil
Taking on the world’s toughest energy challenges*
ExxonMobil upstream affiliates gave a strong showing at the 2013 Society of Petroleum Engineers (SPE) annual technical conference and exhibitions. Its companies received the Diamond Distinguished Corporate Support Award, the highest corporate award category; Cletus Egbezie, General Manager, Operations Technical Subsurface (OTSS) for Mobil Producing Nigeria (MPN) received the Distinguished Individual Support Award from the Lagos Section and Risi Onwude, Asset Development Planner in MPN, had her presentation adjudged best technical paper.

The four-day conference was themed: To Grow Africa’s Oil & Gas Production - Required Policy, Funding, Technology, Techniques & Capabilities. Mr. Mark Ward, Chairman/Managing Director, ExxonMobil Upstream Companies in Nigeria was represented by Mr. Udom Inoyo, Executive Director HR, at the Human Capacity panel session on the second day of the conference, and Mrs. Oluseyi Afolabi, Executive Director, MPN, was the guest speaker at the launch of the SPE Nigeria Women Professionals Network.

During the SPE conference exhibition, the ExxonMobil affiliates
team guided attendees through the ExxonMobil booth, which showcased ExxonMobil affiliates’ activities in Nigeria, as well as technological advancements in hydrocarbon exploration and production. Presentations were given by representatives from the Medical, Human Resources and Engineering departments on the companies’ Health / HR policies and career opportunities. There were several other activities available for booth visitors, including quizzes, puzzles, and raffle draws, with several prizes to be won.

At the Annual General Meeting of the Society, Ernest Mkpasi, Oso Reservoir Lead / ATC was elected into the SPE Nigeria Council as well as the Secretary of the Lagos Section. Temitope Oshuntuyi and Eloka Anidi both of OTSS were elected as Membership and Young Professionals Program Chairpersons respectively for the Lagos section. Uzo Enelamah and Temitope Oshuntuyi had earlier received service awards for their contributions to the outgoing executive.
The conference and exhibitions were rounded up with an evening award ceremony, where ExxonMobil affiliates were presented with SPE’s Diamond Corporate Support Award. Receiving the Corporate Support Award on behalf of ExxonMobil affiliates, Mr. Egbuzie reiterated the Companies’ commitment to supporting the SPE, and to sustaining a mutually beneficial partnership with them.

He noted that more than 60% of Engineers and Geoscientists in ExxonMobil upstream affiliates are members of the Society and that our staff are being encouraged to participate more actively in SPE activities. As OTSS General Manager, Mr. Egbuzie has functional oversight of all Reservoir and Subsurface Engineering activities in Upstream Nigeria.

The SPE Chairman, Osayande Igiehon, noted that “Cletus is a long standing member of the Society of Petroleum Engineers. He continues to support SPE in full participation in all ramifications. With his help, SPE continues to enjoy full participation of Mobil Producing Nigeria in technical paper presentations, conference chairs, sponsorship of key conference programs and monthly technical sessions”.

Activities at the ExxonMobil booth during the SPE exhibition
The conference and exhibitions were rounded up with an evening award ceremony, where ExxonMobil affiliates were presented with SPE's Diamond Corporate Support Award. Receiving the Corporate Support Award on behalf of ExxonMobil affiliates, Mr. Egbuzie reiterated the Company’s commitment to supporting the SPE, and to sustaining a mutually beneficial partnership with them. He noted that more than 60% of Engineers and Geoscientists in ExxonMobil upstream affiliates are members of the Society and that our staff are being encouraged to participate more actively in SPE activities. As OTSS General Manager, Mr. Egbuzie has functional oversight of all Reservoir and Subsurface Engineering activities in Upstream Nigeria.

The SPE Chairman, Osayande Igiehon, noted that “Cletus is a long standing member of the Society of Petroleum Engineers. He continues to support SPE in full participation in all ramifications. With his help, SPE continues to enjoy full participation of Mobil Producing Nigeria in technical paper presentations, conference chairs, sponsorship of key conference programs and monthly technical sessions.”

Risi Onwude, Asset Development Planner for Mobil Producing Nigeria, received the award for Best Technical Paper delivered at the 2013 SPE conference. Her paper titled “Maximizing Recovery from Gas Injection in a Complex Channel System - Edop Field Case Study” addressed how the integration of seismic data with reservoir pressure and production performance has helped to identify some significant bypassed oil opportunities as well as improve recovery in the Edop Intra Qua-iboie (IQI) reservoirs. In the Edop Field, understanding reservoir interconnectivity and compartmentalization is key to production uplift and pressure maintenance. The paper was co-presented with Akinsanmi Ojo of Operations Technical Geoscience (OTG) department.

Risi joined MPN in October 2004 as a reservoir engineer in the Usari Asset Level Team (ALT), before becoming lead reservoir engineer for the Edop Asset in 2008, and then Asset Team Coordinator for the Edop ALT in 2011. She joined the Development Planning group in 2012 as an Asset Development Planner.
Mobil Oil Nigeria (MON) held its 35th Annual General Meeting (AGM) on Tuesday May 28, 2013 at the Shell Hall, Muson Center, Onikan, Lagos. In attendance were about 400 stakeholders, including company shareholders, representatives from the Securities and Exchange Commission, the Nigeria Stock Exchange, PricewaterhouseCoopers, the Press and other Government Agencies.

Highlights of proceeding included the adoption of the 2012 Reports & Accounts as prepared in accordance with International Financial Reporting Standards (IFRS). The meeting also reelected Engr (Mrs.) Mayen Adetiba and ratified the election of Michel Gouzerh to the Board of MON. The Chairman of the Board and Managing Director, Tunji Oyebanji gave detailed stewardship of MON business for the full year of 2012.

Mobil Oil Nigeria Plc recorded an after tax profit of N2.9 billion in 2012, a 29% decline when compared with 2011. The Company though posted a turnover of N80.8 billion, an increase of 30% against the previous year’s performance. Key indicators that affected the Company's performance included sales lost in January 2012 as a result of the subsidy protests, as well as supply constraints and stock-out of key lubricant products.

L-R: Mr. Henry Ikem Obih, Executive Director; Mr. Alistair MacNaughton, Executive Director; Mr. Abba Kyari, Non-Executive Director; Engr. (Mrs.) Mayen Adetiba, Non-Executive Director; Mr. Tunji Oyebanji, Chairman/Managing Director; Mr. Michel Gouzerh, Non-Executive Director and Mr Emmanuel Amade, Company Secretary.
Mobil Oil Nigeria (MON) held its 35th Annual General Meeting (AGM) on Tuesday May 28, 2013 at the Shell Hall, Muson Center, Onikan, Lagos. In attendance were about 400 stakeholders, including company shareholders, representatives from the Securities and Exchange Commission, the Nigeria Stock Exchange, PricewaterhouseCoopers, the Press and other Government Agencies.

Highlights of proceeding included the adoption of the 2012 Reports & Accounts as prepared in accordance with International Financial Reporting Standards (IFRS). The meeting also reelected Engr (Mrs.) Mayen Adetiba and ratified the election of Michel Gouzerh to the Board of MON. The Chairman of the Board and Managing Director, Tunji Oyebanji gave detailed stewardship of MON business for the full year of 2012.

Mobil Oil Nigeria Plc recorded an after tax profit of N2.9 billion in 2012, a 29% decline when compared with 2011. The Company though posted a turnover of N80.8 billion, an increase of 30% against the previous year's performance. Key indicators that affected the Company's performance included sales lost in January 2012 as a result of the subsidy protests, as well as supply constraints and stock-out of key lubricant products occasioned by a change in the product formulation.

The Chairman noted that during the period under review, another debilitating factor was the closure of the Apapa PMS pipeline terminal for scheduled maintenance, leading to loss of depot margin and the fact that security issues affected businesses in some parts of the country.

MON adoption of IFRS Reporting in accordance with statutory prescriptions was lauded by shareholders. MON was also praised for its full adherence to good Corporate Governance and respect for law in the conduct of its business operations in Nigeria - an indication that MON continues to be perceived as an ethical business and partner of choice in the downstream business in Nigeria.

Questions posed by shareholders on the business and environmental issues were satisfactorily answered by Tunji Oyebanji. These ranged from need to pay higher dividends, earning-per-share, safety performance, audit committee composition, support and education for women, malaria initiatives, retail station services and expansion, contingent liabilities, working capital management, size of the board, and employment.

Oyebanji reaffirmed the Company's commitment to develop its human capital, noting that over half of the workforce attended at least one training/workshop in 2012. He promised that MON will continue to support free competition and the deregulation of prices and margins such that the company continues to ensure an economic return for investors.
Mobil Producing Nigeria Unlimited (MPN), operator of the Nigerian National Petroleum Corporation (NNPC) / MPN Joint Venture, has signed a Seller’s Representative Agreement (SRA) for the Qua Iboe Power Project, located at MPN’s Qua Iboe terminal in the state of Akwa Ibom.

“This project is a tangible demonstration of MPN’s commitment to Nigeria and supports the President’s priority of providing electricity to the country,” said Mark Ward, managing director, Mobil Producing Nigeria.

The signing of the SRA is a critical part of the overall commercial framework that enables MPN to undertake power activities and facilitates the sale of power by MPN to Nigerian Bulk Electricity Trading Plc for itself and on behalf of Nigerian National Petroleum Corporation.

Front End Engineering Design and Environmental Impact Assessments for the project have been concluded, while commercial tenders for Engineering, Procurement and Construction are near completion.

Nigeria's MOH Wins Global Affiliates' Safety Award

Upstream Nigeria's Medicine and Occupational Health (MOH) department emerged winners of the most recent "Medicine and Occupational Health- Global (MOH) Safety and Health Award competition". The Global Medical Director, Dr Deena L. Buford announced the outcome of the competition, with Nigeria taking the top spot in the operations category for well-organized internal safety and health activities being conducted, including the use of local awards, monthly safety meetings and weekly safety actions undertaken by staff. MOH clinical staff were also said to have responded actively to the blood borne pathogen incident MOH experienced in 2012, and a large number of hazard identification reports were made, ensuring the creation of a safe working environment for office staff.

Entry to this completion is open to all ExxonMobil affiliates. MOH Nigeria won the maiden MOH Global Safety and Health Award in 2009 and has had several special mentions in the intervening years.

Coordination of the activities leading to the unit's exceptional performance were Mathew Olota, for the field clinics, Florence Onalaja for the Downstream clinic and Olajide Adedipe for the Mobil House Clinic.

Commenting on his team's performance, the Group Medical Director, Dr Bello Aliyu not only commended the team for sustaining the level of performance that saw them winning the maiden award four years ago, but appreciated the Nigeria affiliate Safety Program from which the department developed its local programs, thereby remaining highly competitive among its peers.

As an example, he noted that Loss Prevention Observation has so much been practiced that it presents several opportunities to update and improve on the safety components of the clinical practices; some of which are shared globally.

He added that the safe performance of day to day clinical activities correlated with nearly flawless Controls Integrity Management System (CIMS) audits achieved by the department in the last 3 audit cycles.

This year's World Malaria Day was themed, 'invest in the future. Defeat malaria. The time is now', and the ExxonMobil Foundation was looking to do just that. The Foundation marked Malaria Day with a series of activities aimed at raising awareness, promoting anti-malaria behavior, and offering treatment for malaria victims, with the long term goal of eliminating malaria in Nigeria once and for all.

The ExxonMobil foundation sponsored the Youth Empowerment and Development Initiative (YEDI) NGO to host the 'Kick Against Malaria' football Tournament in Lagos. The tournament involved six schools (4 male teams and 2 female teams) and gave YEDI (and the Foundation) the opportunity to spread the malaria prevention and treatment message, not only to the students but the community at large; malaria testing sites were also available at the tournament location.

Additionally, YEDI hosted a 'Creative Kid's Fight Malaria Competition: a drawing contest for primary school students and an essay competition for secondary school students in Lagos. The essay and art contests were malaria themed - students wrote essays and illustrated how malaria endangered lives, as well as how it could be prevented, ensuring that they acquired knowledge of the disease- and how to prevent and treat it- while the competition progressed.

ExxonMobil Takes the Fight to Malaria

Winners of the Essay and Art competition with their prize cheques

Winners of the football competition receiving their trophies
The Ibom Programme on Environmental Awareness (IPEA) was launched on June 5, 2013 in Uyo by Governor Godswill Akpabio. The Governor was represented by his deputy, Noble Lady Valerie Ebe. Also in attendance at the programme launch were the state commissioner for Environment and Mineral Resources, Prince Enobong Uwah, and AKS Head of Civil Service, Mrs. Cecelia Udoessien.

The IPEA is an initiative of the Akwa Ibom State Ministry of Environment & Mineral Resources in partnership with ExxonMobil, aimed at creating awareness on pollution, and helping the citizens of Akwa Ibom state develop positive environmental values that will enable them manage instances of environmental pollution that may occur, as well as prevent potential environmental hazards from happening.

IPEA will focus on sensitizing communities across Akwa Ibom State through a combination of town hall engagements, TV/radio messages, printed messages, workshops and online campaigns. The messages would focus on the control of land, air and water pollution and will engage the general public, farmers, fishermen, healthcare providers and service companies to encourage best practices in order to curtail environmental pollution.

Following the programme launch, a training workshop was recently held for advocacy team members in Uyo, Akwa Ibom State. The one-day training was designed to empower IPEA personnel to effectively enlighten people at motor parks, schools, abattoirs, restaurants and other locations as part of the recently-launched environmental awareness campaign in Akwa Ibom State.

In his remark at the training, the General Manager, Public and Government Affairs, Mobil Producing Nigeria Unlimited, Mr. Paul Arinze, represented by Mrs. Regina Udobong, called on the...

The IPEA is an initiative of the Akwa Ibom State Ministry of Environment & Mineral Resources in partnership with ExxonMobil, aimed at creating awareness on pollution, and helping the citizens of Akwa Ibom state develop positive environmental values that will enable them manage instances of environmental pollution that may occur, as well as prevent potential environmental hazards from happening.

IPEA will focus on sensitizing communities across Akwa Ibom State through a combination of town hall engagements, TV/radio messages, printed messages, workshops and online campaigns. The messages would focus on the control of land, air and water pollution and will engage the general public, farmers, fishermen, healthcare providers and service companies to encourage best practices in order to curtail environmental pollution.

Following the programme launch, a training workshop was recently held for advocacy team members in Uyo, Akwa Ibom State. The one-day training was designed to empower IPEA personnel to effectively enlighten people at motor parks, schools, abattoirs, restaurants and other locations as part of the recently-launched environmental awareness campaign in Akwa Ibom State.

In his remark at the training, the General Manager, Public and Government Affairs, Mobil Producing Nigeria Unlimited, Mr. Paul Arinze, represented by Mrs. Regina Udobong, called on the participants to “take full advantage of the training programme to sharpen their skills to educate target audiences and encourage best practices to curtail all kinds of environmental pollution - air, water and earth pollution”.

Mr. Arinze reiterated ExxonMobil’s commitment to the environment which has been demonstrated by the company’s partnership with Akwa Ibom State Ministry of Environment & Mineral Resources to achieve a cleaner and safer environment.

Declaring the training open, the Commissioner for Environment & Mineral Resources, Prince Enobong Uwah, represented by the Permanent Secretary, Ministry of Environment & Mineral Resources, Mrs. Atim Enoh, commended ExxonMobil for supporting the environmental awareness campaign. According to the Commissioner ‘the State Ministry of Environment & Mineral Resource is grateful to ExxonMobil for sponsorship of IPEA. This gesture by ExxonMobil reflects its commitment to a cleaner environment in Akwa Ibom State’. Prince Uwah advised the participants to make good use of the opportunity offered by the training to ensure that objectives of campaign were achieved.

The training witnessed presentations by resource persons including Dr. James Asuquo, a lecturer in the Department of Chemistry, University of Uyo and Mr. Stephen Erakpotobar, an environmental expert. The training focused on key issues such as sources of water, air and land pollution and remedies as well as behavioural change communication.

L-R: Enobong Uwah, Commissioner for Environment & Mineral Resources; Noble Lady Valerie Ebe, Deputy Governor of Akwa Ibom State; Oladotun Isiaka, Deputy GM, Mobil Producing Nigeria and Cecilia Udossien, Head of Civil Service, Akwa Ibom State.
Mobil Producing Nigeria (MPN) has partnered with the Federal Road Safety Corps (FRSC) to initiate the Road Safety Awareness Campaign (RSAC) program, which aims to support the agency’s target to reduce current national road accident rates by 50 percent and attendant fatalities by 20 percent over a 12 month period.

The initiative involves a robust data-based intervention, awareness and education drive over 12 months across several States in Nigeria, and is a direct response to data compiled over the five years leading to 2012, which identified the most accident/fatality prone roads across the country.

In addition to financial support to the FRSC, MPN will also share insights, best practices and processes from their global safety framework to augment the Commission’s work.

Nigeria is currently ranked as having one of the highest road accident rates in the world, with much of it caused by human error, ignorance or attitude. With the additional support from MPN, the RSAC hopes to turn around the country’s road safety record.

Above: L-R: Osita Chidoka, Corps Marshal and Chief Executive of the FRSC; Henry Angulu, Special Adviser to the Minister of Information; Udom Inoyo, Executive Director, Human Resources, ExxonMobil affiliates in Nigeria

Esso Hold University Assistance Program Workshop in University of Ibadan

Esso Exploration and Production Nigeria Limited (EEPNL) recently organized a train-the-trainer workshop for university professors under the University Assistance Programme (UAP), in order to update their requisite skills in the use of Petrel workstations for geosciences interpretation. The UAP is an Education and Capacity Building investment programme organized by EEPNL, in Production Sharing Contract with the Nigerian National Petroleum Corporation (NNPC) which aims to enhance the quality of Geoscience graduates from Nigerian Universities. The UAP programme involves the constructing and donating of Geoscience workrooms equipped with workstations, plotters and printers to selected universities, and by sponsoring the training of lecturers and students on the usage of these machines. Under the UAP, train-the-trainer sessions are frequently organized in order to ensure that professors’ skills at using geoscience interpretation equipment are up to date, for knowledge transfer to students. Initiated in 2007, the UAP pilot phase supported 17 universities from across all geopolitical zones in Nigeria. The UAP is intended to cover all the federal and state owned schools offering Geoscience studies in the coming years.

L-R: Goodluck Adagbasa, Manager, Operation Technical Geoscience, MPN, Dr. Lambert Ai khionbare of Ehimade Nigeria Ltd, Rita Um, Manager (Major Projects), Public and Government Affairs.
Esso Exploration and Production Nigeria Limited (EEPNL), in contract sharing with Nigerian National Petroleum Corporation (NNPC), and Shell Nigeria Exploration and Production Company (SNEPCO) has awarded international post-graduate scholarships to 13 Nigerian students.

The 13 beneficiaries have already secured admission to study different engineering-related courses in various universities abroad. The scholarship awards cover full payment for tuition, accommodation and other fees as specified by the respective institutions, as well as provisions for personal upkeep. EEPNL awards these scholarships annually to help young and brilliant Nigerians further develop themselves academically, in order to boost the pool of qualified manpower for career opportunities in the country’s Oil and Gas industry.

Speaking at the award presentation ceremony, which held in Lagos recently, Mr. Udom Inoyo, Executive Director, Mobil Producing Nigeria, advised the successful students to put more efforts into the pursuit of their professional careers. “You have done well to come this far. But now, you must go...”
Postgraduate Students

even further. You must see yourselves as ambassadors of Nigeria and, above all, you must come back to make contributions to national development," he told the students.

In her remarks, Mrs. Iyabo Ayobami-Ojo, Deputy Manager, National Petroleum Investments Management Services (NAPIMS), while addressing the students, said, "We at NAPIMS have identified EEPNL’s scholarship award as impactful if you desire higher growth in life. My charge to you is that you should go there, work hard and be good ambassadors to ExxonMobil, to your parents and to your country, Nigeria."
ExxonMobil upstream affiliates recently hosted the third edition of the annual “Introduce A Girl to Science and Engineering Day”, welcoming thirty female students and five teachers from two neighboring secondary schools - Kuramo College and Victoria Island Secondary School - for a day of fun and learning at Mobil House.

The mission behind “Introduce A Girl to Science and Engineering Day” is to encourage young, female students to pursue careers in Science, Technology, Engineering and Mathematics (STEM), as well as educating them on what it takes to start a successful career in the oil and gas industry. The initiative was organized by the MPN Chapter of a global ExxonMobil network - the Women’s Interest Network (WIN) - in conjunction with the Public and Government Affairs Department, and coordinated by Bola Ikenweiwe and Nina Bassey.

Omolola Ani, Drilling Upstream Supervisor, delivering the opening address at the “Introduce a girl to Science and Engineering day” event.
ExxonMobil upstream affiliates recently hosted the third edition of the annual "Introduce A Girl to Science and Engineering Day", welcoming thirty female students and five teachers from two neighboring secondary schools - Kuramo College and Victoria Island Secondary School - for a day of fun and learning at Mobil House.

The mission behind "Introduce A Girl to Science and Engineering Day" is to encourage young, female students to pursue careers in Science, Technology, Engineering and Mathematics (STEM), as well as educating them on what it takes to start a successful career in the oil and gas industry. The initiative was organized by the MPN Chapter of a global ExxonMobil network - the Women’s Interest Network (WIN) - in conjunction with the Public and Government Affairs Department, and coordinated by Bola Ikenwewe and Nina Bassey.
The day began with a welcome address by WIN President and Geoscience Coordinator, Nonny Nwogbo, who briefed the girls on the MPN scholarship awards program, and other student empowerment programs offered by the company. Activities then kicked off with a talk from Drilling Operations Supervisor, Omolola Ani, who enjoined the girls to “focus, work hard and achieve their dreams.”

Temi Edu, the Upstream Nigeria Training Coordinator and Human Resources representative gave the girls an overview of ExxonMobil as a company, including the recruitment process and the courses they needed to excel in to be considered as Engineers and Geoscientists at ExxonMobil. The day continued with talks from a newly hired Geoscientist; Temiloluwa Idowu and an also recently employed Engineer; Njideka Mbonu who introduced the girls to Geoscience and Engineering and expounded on their experiences in the company so far.

The next items on the agenda were three fun, hands-on experiments. The girls were assisted in the experiments by WIN volunteers from various disciplines; Past WIN President Patricia Opene-Odili (VR), Jumoke Akinpelu (OTG), Emem Abraham (NPO), Unwana Udoh (OTS), Glory Ekpaha (Logistics, Support Operations), Risi Onwude (Dev. Planning), Seun Arinoso (Procurement), Adewunmi Abudu (Deep Water Operations), Grace Bajowa (Deep Water Operations), Ayodeji Adetunji (NPO), Ifeoma Chukwujindu (Project Execution), Maria Osuji (NPO), Yetunde Adegbesan (Environmental & Regulatory) and Damilola Obasanjo (OTSS).

The girls were taught the principle of relative density and how it governs the behavior of fluids in a petroleum reservoir through an experiment that mixed oil and water together. The students also had an opportunity to create lip gloss, using basic items found at home in a practical demonstration of chemical engineering and they built and raced “puff mobiles” which are cars made from office supplies and powered by blown air. The experiments were a huge hit with the girls, who participated enthusiastically.

The highlight of the day was a one hour question and answer session chaired by Emem Abraham, Design Engineering Supervisor, entitled “Ask an Engineer or Scientist,” where the students had an opportunity to ask any question they had regarding those disciplines.

The day’s activities were rounded up with the awarding of certificates, prizes and gifts to the participants and closing remarks by WIN Vice President and Geoscientist; Sade Babatunde.

The t-shirts were bright blue on the day of the 2013 Charity Walk, and while some clouds were grey, the short spell of rain they brought could not dampen the spirits of ExxonMobil personnel who turned up at Banana Island on May 18th to walk for a good cause.

*The Charity Walk* is hosted annually by ExxonMobil affiliates in Nigeria to raise money for a charity of choice, with hundreds of staff participating in the past couple of years. 2013 was no different - bright blue shirts flooded Banana Island as families and friends took part in the 3 kilometer walk, before going through a 20 minute long musical aerobics session. There were gifts for children, as well as raffle draws for the attendees, making for yet another memorable day out for the ExxonMobil family. Funds realised from the walk are being donated to the Sickle Cell Foundation. Here are some photographs from the day’s activities.

Newly hired ExxonMobil employees received their official induction into the company recently, at an all-day orientation session held at the Black Diamond hotel. The employees were taken through ExxonMobil’s policies on safety and work etiquette, as well as career path options, amongst other things. The all-day learning session was followed by a cocktail in the evening, where the new hires got to interact with each other, and with some of the Management of ExxonMobil Nigeria affiliates. Here’s wishing them all the best as they start their new careers.

ExxonMobil employees are known for their zeal in encouraging young men and women to seek promising careers. Judith Mbonu, Manager, Drilling Procurement, recently led a team of ExxonMobil employees from different areas of the business to deliver career guidance talks at the White Dove high school in Lagos.

Judith Mbonu Speaks at Whitedove Schools

She was accompanied by Nneka Oganwu (Procurement), Shameka Nelson (Drilling), Kazeem C. Mudi (Reservoir Engineer) and Cordelia Orjih (Geoscience), each of whom gave an overview of their various career paths, their roles and responsibilities in the business, as well as the key subjects required to qualify in specific fields of study. The students were encouraged do their best in picking their future careers, and working hard in whatever career path they chose.
Some of ExxonMobil geoscientists celebrated children’s day in ideal fashion - by spending the day at work with their young ones.

Personnel from Operations Technical Geoscience (OTG) department arranged for their children to visit Mobil House to spend some quality time together, as well as learn what their parents do for a living. The children were treated to presentations on the various aspects of an ExxonMobil career, followed by a walk around to each parent's office and interacting with some of their coworkers. The fun filled day was rounded off with snacks for both parents and their children.
Members of staff of the Operations Technical Surface (OTS) Department of Mobil Producing Nigeria recently came to the aid of pupils from St Paul Primary school, Costain Lagos by donating textbooks, writing materials and teaching aids to the school.

Speaking at the presentation ceremony, a member of the team, Angela Ogheneovo explained that in their efforts to give back to the society, the department went round the State in search of schools that are in need of assistance and selected St. Paul.

“What we saw was appalling, and the dilapidated structure in which the children were schooling was heartwrenching. The roof had caved in and almost all the pupils did not have required text books or exercise books to write in.”

Members of the department, headed by General Manager Richard Alexander, voluntarily pulled resources together and fixed the roof with modern aluminum roofing sheets, sought for and purchased books and teaching aids valued at over half a million naira.

The department has set up a team to constantly monitor the progress of the pupils and offer further assistance to them. Subsequently, the group is looking to provide school sandals to the pupils, most of whom come to school bare footed.

Head Teacher of the school Mrs. Abioye Ayabanjo, expressed her gratitude for the gesture and promised that the pupils would put the materials to optimum use with the aim of attaining academic excellence.

Engineer Mrs. Patricia Opene Odili recently received the 2013 leadership award from the Nigerian Society of Engineers for her contributions in promoting the growth and development of engineering in Nigeria. Patricia is very active as a member of the SWE, and has contributed significantly to the empowerment of women in the industry. She is also a member of the ExxonMobil Women’s interest Network (WIN), a group that facilitates the professional advancement and personal growth of all women at ExxonMobil.

The Nigerian Society of Chemical Engineers (NSChE) recently paid a visit to ExxonMobil affiliates in Nigeria. The NSChE representatives, led Engr. (Dr.) Abubakar Lawal Yar’Adua (National president of the association), were received by Jide Ayo Vaughan and some members of the ExxonMobil exploration department.

The NSChE team expressed their satisfaction with ExxonMobil’s achievements in the oil and gas industry, and encouraged them to keep up the good work, while working together with them whenever possible to develop shared interests.
